the decline of the american economy is intended to tell americans that their country's economy which fed american power and buoyed up western civilization in the past two hundred years is declining american leaders and politicians however refuse to admit that there is a problem part of the cause of the problem is politics it is now a country in which we are seeing the ugly side of democracy where nothing gets done because of partisan politics of democracy in my mind however the greater part of the problem is the failure of us economists to understand and diagnose the country's basic economic problems conventional economics in the us and indeed the west is stale and unable to deal with a world that is getting more technologically complicated every day for most conventional economists today the american economy is all about finance interest rates inflation wall street indexes globalization trade economic indexes financial reserves etc for those of them who still think analytically production is made up of only labor and capital omitting material despite it being quite oblivious that one cannot produce anything without materials they continue in the path of increasingly squeezing labor out of production in the name of productivity in order to reinforce the supremacy of finance these are the basic errors of capitalism there is the belief that the sum total of the rowdyism of private enterprise creates maximum economic growth and prosperity for all in the context of capitalism conventional economists equate capital invested in us dollars as the measure of us economic growth achieved through financial management

today many americans regard globalization as a significant threat to our work force and to our very way of life as unemployment soars the american automotive and manufacturing industries crumble countless jobs continue to ship overseas and the retail sector faces the worst slump in decades cries of buy american have grown louder and louder in our communities in the headlines and in the halls of washington but at a time when an italian company has bailed out one of our oldest and most iconic automakers a french german consortium is closing in on a multibillion dollar military contract to build our tanker planes and helicopters companies based everywhere from switzerland to india to belgium are stocking our grocery aisles and the assets of some of our most venerable financial institutions have been stripped down and bought up by banks from hong kong and london what does buy american mean any more that said there is a great deal of discomfort about the influence that foreign companies are exerting on our economy are they making us more competitive in the global marketplace or less are they creating jobs for americans or importing their own workforces are they a threat to our national security or are they bringing us technology that actually makes us safer when they open plants and factories on our shores are they siphoning money from our economy or bolstering it in welcoming their investments are we as some critics contend selling our economy to the highest bidder in the selling of the

american economy new york times senior business correspondent micheline maynard argues that despite the lingering xenophobia that colors american perception of foreign owned companies foreign investments are actually an overwhelmingly positive force not only do they create thousands of jobs and pump billions of dollars into national and local economies she says they reinvigorate and strengthen communities foster innovation and diversity in the marketplace and teach americans new ways to live and work at a time when our most cherished home grown institutions still reeling from the financial crisis are downsizing shuttering plants and factories and filing for bankruptcy the need for foreign investment has never been greater in this compelling narrative maynard shows that if we are in fact selling our economy to the highest bidder this may be very good news for america through moving stories of workers whose lives have been transformed by the arrival of companies like toyota airbus and tata probing interviews with a host of government officials and local leaders who have fought to lure foreign companies to their communities and states and revealing conversations with both american and foreign executives including a rare and hard won visit with toyota s elusive young new president maynard paints a fascinating portrait of the paradigm shift that is transforming the american economy and remaking the american dream

every economic system exists only to satisfy human wants yet most systems fail to do so taking a keen look at the gap between goal and result stanley lebergott appraises public policies relating to the u s distribution of income and wealth today part i shows that many programs have disappointed their proponents because certain basic assumptions were not understood the author s new data suggest more realistic answers to much debated questions are the rich getting richer how much upward mobility exists what approaches to poverty starvation and discrimination are practical today in part ii size distributions are derived for wealth in 1970 for income in 1900 and for white and non white income for the period 1900 1970 these data include new estimates for key items in the standard of living since 1900 with detail on services that have dominated the postindustrial economy originally published in 1976 the princeton legacy library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of princeton university press these editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions the goal of the princeton legacy library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by princeton university press since its founding in 1905
